

Basic GMP

Understand GMP and learn how companies work with it in practice

This course, including evening activities and an overnight stay, provides you with a solid foundation in GMP. You will learn through case work, exercises, and a GMP game.

The course also gives you the opportunity to network with others who are new to life science.

About the course

GMP (Good Manufacturing Practice) is a set of rules and standards that ensure medicinal products are manufactured consistently and safely. GMP supports quality, traceability, and patient safety.

In this course, you will receive a thorough introduction to GMP and the EU rules governing the manufacture of medicinal products. You will gain a fundamental understanding of the requirements, responsibilities, and mindset needed to work in a GMP-regulated environment.

You will be introduced to the life science industry and the journey a medicinal product takes to reach the market.

You will explore the link between legal requirements, quality, and patient safety. We take an in-depth look at the EU GMP guidelines (EudraLex Volume 4).

You will work with key topics such as:

- The Pharmaceutical Quality System
- Risk Management
- Requirements for Manufacturing
- Personnel
- Premises and Equipment
- Documentation

The course combines presentations, discussions, and practical exercises.

You will also participate in an interactive GMP simulation game based on typical workplace situations. The game encourages engaging discussions and makes it easier to translate GMP principles into everyday practice.

The course is delivered over two days and includes an overnight stay,

providing time and space for reflection, deeper learning, and networking with fellow participants.

This significantly enhances your overall learning experience and maximizes the value of the course.

Target group

The course is aimed at academics and technicians who are inexperienced with GMP, as well as new employees in the life sciences industry who need a basic understanding of GMP.

It is also suitable for those already working with GMP who want a deeper understanding of the rationale behind their work and the GMP regulations.

What you gain

Your benefits

- You understand the fundamental principles of GMP and the structure of the EU GMP guidelines.
- You can work more confidently with documentation, quality and GMP requirements.
- You can apply a basic GMP mindset and contribute to ensuring the quality of medicines.

Your company's benefits

- Your employee has an understanding of GMP, quality, GMP-mindset and responsibility.
- Your employee works more consistently and correctly according to applicable regulations.
- Your employee contributes to improved quality and patient safety.

Course program

Day 1: 09:00 – 21:00

- Legal Basis
- Premises and Equipment

Day 2: 09:00 – 16:00

- Production
- Documentation
- Deviations and changes
- Personnel

The course consists of presentations, discussions and exercises.

Course Objective: The participant gains a basic knowledge of the applicable EU-GMP regulations Part I and their interpretation.

The participant gains an understanding of what it means to work according to GMP and understands the mindset required to manufacture safe medicines.
